Education

Master of Science in Engineering (cand.polyt), Technical University of Denmark (DTU), august 2008.

Currently

Founder at Oase

Keywords: *Event Sourcing, CQRS, React Native, Elixir, Phoenix Framework*

Oase is a danish startup that is building a platform for communities to communicate and coordinate their work.

Read more about Oase on oase.app

Founder at Promise

Keywords: *Event Sourcing, CQRS, Ruby on Rails, Security, Encryption*

Promise is a utopian dream of having a secure and private single sign-on provider to use everywhere.

Read more about Promise on promiseauthentication.org

Board member at Skærmsund Barndom - 2023

Keywords: *Community building, Public speaking*

Skærmsund Barndom is a danish parent-led non-profit organization that fights for a healthier relationship to tech for our kids.

Past

Platform Architect and Lead Engineer - Zetland - 2015-2023

Keywords: *Mentoring, Event Sourcing, CQRS, Ruby On Rails, React, RabbitMQ, React Native, Recruiting*

Zetland is a danish media company publishing quality journalism to over 23.000 members on their own digital platform.

The platform consists of a custom CMS, an API, a React frontend and a React Native app (built for Android and iOS).

My responsibilities includes the architecture, implementation, integration, running and scaling of the platform.

Developer - Firmafon - 2013-2015

Keywords: *Angular.js, Cordova, Ruby on Rails, Freeswitch, Puppet, RabbitMQ, Recruiting*

Was part of the team that developed everything from real-time phone systems, including voice-mail, to internal sales team settling tools.

Senior Developer - Issuu - 2012-2013

Keywords: *Javascript, Ruby on Rails, node.js, SASS, Grunt*

Lead developer on Magma which was written in Ruby on Rails.

Worked on issuu.com frontend in JavaScript, where I was responsible for part of the sign up funnel.

CTO - autobutler.dk - 2011-2012

Keywords: *Project management, Ruby on Rails, Recruiting*

Responsible of implementation and operation of the product, and building the delopment team.

Developer - Benjamin Media - 2009-2010

Keywords: *FreeBSD, Ruby on Rails, Capistrano, Unicorn, PostgreSQL, server architecture, creditcard payment, security*

At Benjamin Media, besides implementing features on their applications, my responsibility was to make our applications scale in close cooperation with their hosting provider.

Personal

Born december 12th, 1980.
