Education

Master of Science in Engineering (cand.polyt), Technical University of Denmark, august 2008.

Currently

Platform Architect and Lead Engineer - Zetland - 2015

Keywords: *Event Sourcing, CQRS, Ruby On Rails, React, RabbitMQ, React Native*

Responsible for both architecting, developing, scaling and maintaining the platform used for distribution of the journalism provided. The platform consist of a custom CMS, two native apps (iOS and Android), a web frontend, a server backend and integrations to a number of third parties.

Vi Media AB bought a license for the platform in 2019 to run vi.se.

Past

Developer - Firmafon - 2013-2015

Keywords: *Angular.js, Cordova, Ruby on Rails, Freeswitch, Puppet, RabbitMQ*

Was part of the team that developed everything from real-time phone systems, including voice-mail, to internal sales team settling tools.

Senior Developer - Issuu - 2012-2013

Keywords: *Javascript, Ruby on Rails, node.js, SASS, Grunt*

Lead developer on Magma which was written in Ruby on Rails.

Worked on issuu.com frontend in JavaScript, where I was responsible for part of the sign up funnel.

CTO - autobutler.dk - 2011-2012

Keywords: *Project management, Ruby on Rails, Heroku*

Responsible of implementation and operation of the product, and building the development team.

Developer - Benjamin Media - 2009-2010

Keywords: *FreeBSD, Ruby on Rails, Capistrano, Unicorn, PostgreSQL, server architecture, creditcard payment, security*

At Benjamin Media, besides implementing features on their applications, my responsibility was to make our applications scale in close cooperation with their hosting provider.

Analyzed our application, pinpointed and solved bottlenecks.

Did a major restructuring of our servers switching from Mongrel to Unicorn.

Implemented credit card payment on our subscription signups.

Developer - Gigahost ApS - 2008

Keywords: *Linux, PHP, webudvikling, Apache, MySQL, serveradministration, selvstændigt, Mogile FS*

Configured the distributed file system Mogile FS.

Implemented a domain renewal system for Gigahost customers to use to manage their domains.

Configured PowerDNS and an administration system around it.

Side projects

hurtigfaktura.dk - 2008

Keywords: *Ruby on Rails, L^AT_EX*

A simple online tool to generate an invoice.

Personal

Born december 12th, 1980.
