Education

Master of Science in Engenineering (cand.polyt), Technical University of Denmark, august 2008.

Currently

Platform Architect and Lead Engineer - Zetland - 2015

Keywords: *Event Sourcing, CQRS, Ruby On Rails, React, RabbitMQ, React Native*

Zetland is a danish media company publishing quality journalism to over 23.000 members on their own digital platform.

The platform consists of a custom CMS, an API, a React frontend and a React Native app (built for Android and iOS).

My responsibilities includes the architecture, implementation, integration, running and scaling of the platform.

Zetland sold a license to to the platform to Vi Media AB bought in 2019. So they run vi.se on a adapted version of the Zetland platform.

Visit Zetland at `www.zetland.dk`.

Founder at Promise

Keywords: *Event Sourcing, CQRS, Ruby on Rails, Security, Encryption*

Promise is a utopian dream of having a secure and private single sign-on provider to use everywhere.

Read more about Promise on `promiseauthentication.org`

hurtigfaktura.dk - 2008

Keywords: *Ruby on Rails, LaTeX*

hurtigfaktura.dk is a simple online tool that helps small businesses generating invoices that meets all requirements.

Past

Developer - Firmafon - 2013-2015

Keywords: *Angular.js, Cordova, Ruby on Rails, Freeswitch, Puppet, RabbitMQ*

Was part of the team that developed everything from real-time phone systems, including voice-mail, to internal sales team settling tools.

Senior Developer - Issuu - 2012-2013

Keywords: *Javascript, Ruby on Rails, node.js, SASS, Grunt*

Lead developer on Magma which was written in Ruby on Rails.

Worked on issuu.com frontend in JavaScript, where I was responsible for part of the sign up funnel.

CTO - autobutler.dk - 2011-2012

Keywords: *Project management, Ruby on Rails, Heroku*

Responsible of implementation and operation of the product, and building the delopment team.

Developer - Benjamin Media - 2009-2010

Keywords: *FreeBSD, Ruby on Rails, Capistrano, Unicorn, PostgreSQL, server architecture, creditcard payment, security*

At Benjamin Media, besides implementing features on their applications, my responsibility was to make our applications scale in close coorporation with their hosting provider.

Analyzed our application, pinpointed and solved bottlenecks.

Did a major restructuring of our servers switching from Mongrel to Unicorn.

Implemented credit card payment on our subscription signups.

Developer - Gigahost ApS - 2008

Keywords: *Linux, PHP, webudvikling, Apache, MySQL, serveradministration, selvstændigt, Mogile FS*

Configured the distributed file system Mogile FS.

Implemented a domain renewal system for Gigahost customers to use to manage their domains.

Configured PowerDNS and an administration system around it.

Personal

Born december 12th, 1980.
